

CYBER CRISIS TEAM

Before | During | After

Nowadays, cyber-attackers get inside quickly and create havoc, even destroying businesses with lockdown ransomware, fraudulent money transfer, and other criminal schemes. Is there no end to cybersecurity disorder? A data breach threatens company survival! And, a mishandled investigation can create long-lasting legal exposure. We have assembled decades of specialized expertise assembled into a cyber crisis team that can be retained for the business under a subscription plan. OnCall Cyber™

ONCALL CYBER™ VALUE PROPOSITION: THE POWER OF THE BUNDLE

By offering a bundled set of essential services in a subscription – cyber law, incident response, and cyber insurance – the value proposition of the whole exceeds stand-alone services because you get an integrated team of experts. The team offers efficiencies, pre-breach preparedness, customer knowledge and relationship, and trusted security advice. Moreover, insurance adds confidence of survival, which businesses need in the present cyberattack environment.

- We offer specialized legal representation for cyberattack
- We help with insurance claims
- We provide breach coaching
- We are available on call 24/7/365
- We provide an overlay to existing unqualified legal counsel
- We minimize the risk of legal exposure

Recent data breach litigation has shown that failures of breach coaching procedures during incident response can lead to the release of a treasure trove of evidence.

You are covered from all
angles

CYBER CRISIS TEAM

Prevention | Response | Insurance

CYBER INSURANCE

The cyber threats faced by companies in today's digital environment can be devastating and often very expensive. Our industry leading and affordable insurance covers first and third-party cyber-related exposures and expenses including data breaches, legal defense costs, ransom expenses from a ransomware attack, and system disruption. Cyber Insurance addresses nearly every aspect of a company's total cyber exposure.

INCIDENT RESPONSE

Establish a pre-incident relationship to have at the ready a team experienced in digital forensics and incident response to investigate, contain and remediate a serious cyberattack. Ready at a moment's notice and knowledgeable about your incident response plan and infrastructure, our experts will forensically preserve evidence and perform an analysis in our secure sandbox environment to uncover important facts regarding the incident.

CYBER LAW

Cyber law is a new practice of law that requires specialized know-how and experience. Expertise in cyber law is critical to an incident response! Legal exposure and brand protection are the two most significant concerns that businesses face after experiencing a cyberattack. OnCall Cyber™ relies upon The CyberJurist Network™ for cyber law breach coaching. A breach coach is the industry best practice for conducting a cyberattack investigation, because enveloping investigative data with privilege is critical in litigation. OnCall Cyber™ establishes a trusted relationship with specialized cyber law counsel well in advance of a serious incident.

OnCall Cyber™ offers various monthly subscription levels/services to accommodate small to medium businesses. For a low monthly price, as well as packages and insurance to handle larger risks, the OnCall Cyber™ subscription service includes:

- Legal Representation: Cyber Legal representation with attorney / client privilege and trusted advisory at suitable service levels that comport with a client's level of risk;
- Legal Onboarding: An initial engagement to advise you concerning cyber-related duties and risks, and to set up your Incident Response Plan;
- Cyber Insurance policy: Coverage and premium based on insurable risk (starting at \$750,000 up to \$25,000,000+ in coverage); and
- Technical Expertise: An experienced Incident Response Team that possesses institutional knowledge of the client to help create the incident response plan.
